For more information or to receive a hard copy of this plan, contact: Diana Gibbs, VP of Marketing and Community Health Improvement at <u>d.gibbs@nvrh.org</u> or 802-748-7590 This plan was adopted by the NVRH Board of Trustees on January 29, 2025.

NVRH adopted new Mission, Vision, and Values statements in fall 2023.

#### Introduction

Northeastern Vermont Regional Hospital (NVRH) conducted a Community Health Needs Assessment (CHNA) in fiscal year 2024. This Implementation Plan is a companion piece to the needs assessment report, serving the period from 2024-2027. The Implementation Plan outlines a plan of action for how NVRH plans to address the top community health priorities for the next three years. Both the Community Health Needs Assessment and the Implementation Plan can be found at <u>https://nvrh.org/community-health-needsassessment/</u>.

The primary service area encompasses Caledonia and Southern Essex Counties. The primary service area for NVRH is over 30,000 people. The Vermont Department of Health defines the service area as these towns and their villages in Caledonia and Southern Essex Counties in northeastern Vermont: Barnet, Burke town, Concord town, Danville

town, East Haven, Guildhall, Granby, Kirby, Lunenburg, Lyndon town, Maidstone, Newark, Sheffield, St. Johnsbury town, Sutton, Victory, Walden, Waterford town, Wheelock. The major population centers are St. Johnsbury, Lyndon, and Danville. All other towns have less than 2000 people. Residents of other surrounding towns including Peacham, Gilman, Ryegate, Glover, Barton, and several others consider NVRH their community hospital.

### **Collaborative Process and Timeline**

The Northeast Kingdom Coordinated CHNA Steering Committee formed in January 2024 and led this inaugural CHNA approach *(see Appendix for Steering Committee member list)*. The participating member organizations include NVRH, North Country Hospital, Northeast Kingdom Human Services, Northern Counties Health Care, Northeast Kingdom Community Action, Northeast Kingdom Council on Aging, and the Vermont Department of Health. Between February and May, extensive secondary data analysis occurred. Primary data collection approaches were developed and implemented between April and August. Final data analysis and development of the HSA-level report occurred between August and September 2024. The NVRH Board of Trustees adopted the St. Johnsbury Health Service Area CHNA report on September 25, 2024. NVRH made this report publicly available following Board adoption.

#### **Community Health Needs Assessment Key Findings**

Key findings for this 2024-2027 CHNA cycle are integrated into this report by priority area, with an emphasis on the most significant needs as evidenced by both primary data, including the community survey and focus groups, and secondary data sources. The CHNA community survey examined the following areas: community health and social needs, personal health, health and dental care, support service needs, and demographics. Focus groups were designed to enhance understanding related to the survey findings. This approach is intended to offer a meaningful understanding of health needs both from the community perspective as well as state and national surveillance and health data.

#### St. Johnsbury Health Service Area Health Priorities

#### Health Need Priority 1: Mental Health and Substance Use

- Access to services
- Workforce shortages

#### Health Need Priority 2: Access to Care and Affordability

- Mental Health access
- Dental care access
- Understanding insurance and affordability
- Transportation

#### Health Need Priority 3: Chronic Disease Prevention and Management

- Behavioral risk factors
- Disease prevalence

#### Health Need Priority 4: Social Determinants of Health

- Access to healthy and affordable food
- Housing
- Cost of living
- Awareness of resources and greater collaboration

#### **Health Equity**

The complex interplay among societal, economic, and environmental factors affects health outcomes to a greater extent than clinical healthcare delivery, influencing fair and just opportunities for health in our communities. We know not everyone has equal access to the circumstances, environment, or factors that promote and sustain health. There are conditions, or characteristics, that affect a person's ability to lead a healthy life and result in unequal health outcomes, creating health disparities. The 2024 Vermont State Health Improvement Plan identified key populations regarding equity, including older Vermonters, people who identify as LGBTQ+, people of color, people living with disabilities, people who are unhoused, and Indigenous people. Further, the State assessment indicated clear disparities experienced by each priority population, as well as underrepresentation in national survey data that contributes to lack of understanding of social, cultural, and health needs<sup>1</sup>.

As compared to Vermont state-wide estimates, a greater proportion of NEK residents are people with a disability, lower median household and individual incomes, live in a rural setting, insured through Medicaid, fewer per capita healthcare professionals (including primary care physicians, mental healthcare, and dentists), use safety net programs, fewer physical activity opportunities, and less civic participation.

We know that not everyone has the same opportunity to be healthy. As we work to improve health in our communities, we know we have to be intentional about improving the systems and structures within our organizations and in our region and state that support health and equal opportunities for all.

The Community Health Needs Assessment 2024 validated the objectives of NEK Prosper!, the Accountable Health Community serving Caledonia and Southern Essex Counties, that our communities will be:

- **Financially Secure** Earning enough money to support yourself and your family; not worrying about money.
- Physically Healthy Maintaining physical health and well-being through healthy behaviors and medical care.
- Mentally Healthy Coping well with the normal stresses of life; reaching your potential; making a contribution to your community.
- Well Nourished Having enough healthy food to eat.
- Well Housed Living in affordable and safe homes located in healthy communities with opportunities for positive social interactions.

<sup>&</sup>lt;sup>1</sup> State Health Improvement Plan 2024: <u>https://www.healthvermont.gov/sites/default/files/document/SHA-Community-Engagement-Report-Climate%20Change\_0.pdf</u>

#### **Priority Criteria**

Over the next three years, NVRH will implement initiatives, and programs and services that work to meet these five objectives to improve health in the community, while intentionally addressing the underlying causes of health disparities.

The purpose of our community health needs assessment is to identify initiatives at the individual, community, environmental, and policy level, as well as programs and services that meet our mission to improve the health and wellbeing of all in the communities we serve.

NVRH has a long-standing commitment to holistic approaches to wellness, recognizing the critical integration of social care into healthcare. Research tells us that healthcare alone plays a surprisingly small role in overall health – estimated around 20%. Social determinants of health, like income, education, affordable housing, and access to healthy food, coupled with access to medical care and mental health services all play a role. As a hospital, we cannot do this alone.

The leading criterion for priority setting for our work is the ability to collaborate with our community partners and capitalize on our many community resources and assets. As illustrated in prior CHNAs, we will prioritize solutions that:

- Maximize the unique expertise and resources of NVRH
- Have the greatest impact on our most vulnerable populations
- Have results that are enhanced by working with our community partners
- Have potential for short-term impact on community health
- Reduce the long-term cost of healthcare to the community
- Are tested/proven approaches to community health improvement
- Continue to be important to people who live in our communities

Further, priority selection includes areas where the region is worse than the benchmark measure, identified by the community, feasible to address, and will impact health disparities.

#### **Process and Decision Makers**

NVRH's Board of Trustees, Community Relations Committee, and Corporators were apprised of the process for the Community Health Needs Assessment throughout fiscal year 2024 (October 1, 2023 – September 30, 2024), and given an overview of the process in March 2024 and a presentation of the health priorities and findings in September 2024. The Board of Trustees adopted the CHNA report on September 25, 2024 and adopted the CHNA Implementation Plan on January 29, 2025. The Board of Trustee members are listed in the Appendix.

#### **Measurable Objectives and Rationale for Objectives**

## Results-Based Accountability<sup>™</sup>

The State of Vermont and other organizations in the state and around the country use the Results Based Accountability<sup>™</sup> framework to measure success. RBA is a "disciplined way of thinking and taking action that can be used to improve the quality of life in communities" (*Trying Hard Is Not Good Enough,* Mark Friedman).

Results Based Accountability<sup>™</sup> (RBA) provides a step-by-step process to get results. RBA defines both population level (a measure of whether we have achieved our outcome goals for the defined population) and performance level (measure of how well a program or service is working) measures. RBA uses a common sense approaches to gather data; easy things like community surveys with just a few questions or a show of hands at a meeting. RBA asks these simple questions:

- How much are we doing?
- How well are we doing it?
- Is anyone better off?

The NVRH Community Health Needs Assessment Implementation Plan uses RBA to measure impact, evaluate initiatives, and drive action and change.

#### **Methods for Reporting Progress**

Progress on the implementation of the initiatives in the form of the CHNA Evaluation will be conducted annually and made publicly available to NVRH leaders, the State of Vermont, and our community. The evaluation is also posted on the NVRH website at <a href="https://nvrh.org/community-health-needs-assessment/">https://nvrh.org/community-health-needs-assessment/</a>, as required by the Green Mountain Care Board.

#### Additional Information for Implementation Strategies

#### Community Benefits and Schedule H

The NVRH Community Health Needs Assessment informs our Implementation Plan and our community benefit spending. NVRH allocates community benefit dollars from our operating budget each year. Initiatives funded in this Implementation Plan are those that meet the IRS definition of community benefit and are reported on our 990 Schedule H. Some initiatives are funded as specific line items in the NVRH Community Health Improvement department budget; others are tracked and reported using CBISA software and often include in-kind expenses, salaries and fringes from one or more departments, and indirect expenses using an indirect cost rate from the NVRH Medicare cost report. When possible a line item dollar amount is included on this Implementation Plan, otherwise "Sch H" is used to indicate that costs for this program is reported through our Community Benefit reporting.

The NVRH community benefit strategy includes a community building approach that goes beyond the delivery of medical care, to improving the health and the quality of life for people in the communities we serve. Community building involves addressing the root cause of health problems such as poverty and related issues, as well as identifying and providing services and programs that directly influence health and quality of life. This can include: physical improvements and housing, economic development, community support, environmental improvements, leadership Community Benefits are programs and services designed to improve health in communities and increase access to health care as a response to identified community needs. They are not provided for marketing purposes.

#### **Community Benefit includes:**

- Financial Assistance
- Government-sponsored means-tested programs
- Other Community Benefit Services
  - Community Health Improvement Services
  - Health Professions Education
  - Subsidized Health Services
  - o Research
  - o Cash and In-Kind Contributions
  - Community-Building Activities
  - o Community Benefit Operations

development, coalition building, community health improvement advocacy and workforce development.

#### NEK Prosper! Collaborative Action Networks

The NEK Prosper! Collaborative Action Networks (CANs) have been allocated NVRH Community Benefit dollars for several years now. The CANs are groups of cross-sector practitioners and individuals who organize around one of the NEK Prosper! community-level outcomes, develop and implement action plans to achieve the outcome, and use continuous improvement processes to measure their impact and improve their strategies over time. Population health data, community input, and evaluation using Results-Based Accountability is a key component in how the CANs choose their strategies. A copy of the request for funds from NVRH is included in the Appendix.

#### NEK Prosper! CAN Request for NVRH Community Benefit Funds

#### What are Community Benefits?

The Patient Protection and Affordable Care Act of 2010 required all not-for-profit hospitals in the US to quantify and report their benefits to the community on Schedule H of their annual IRS 990 form.

To count as community benefit - must address at least one of the following:

- Address a documented community need
- Improve access to health services
- Enhance population health
- Advance knowledge (health education)
- Demonstrate charity purpose

Cannot be for marketing purposes only

Fund availability: Each CAN is allotted up to \$5,000 for Fiscal Year 2025, running from October 1, 2024-September 30, 2025. All requests must be made prior to September 30, 2025.

To access funds, complete and return this form via email to Diana Gibbs d.gibbs@nvrh.org.

Name of CAN	
Name of Contact for CAN	
Contact email and phone	
Funding request amount	
Date needed	
Check payable to (include name and mailing address) W9 required for some payments; include any applicable invoices or receipts.	

Population level measures for the CAN <ul> <li>Indicator(s)/Measure(s)</li> <li>Source of data on this measure</li> </ul>	
<ul> <li>Current value of measure in the NVRH health service area or county</li> </ul>
